

Equations and Equality

Join us at **Kulturhuset (Verdensteatret) on May 8, 17:00**, to celebrate the achievements of women in mathematics within the International May12 Initiative.

The event will feature a screening of the movie "*Hidden Figures*", followed by a panel discussion on diversity and inclusion in academia between scientists from UiT The Arctic University of Norway.

The event is part of the project "Equations for Arctic Equality" founded by the Norwegian Research Council.
